PROFESSIONAL EXPERIENCE

Jump Trading, London, UK: Software Engineer Intern

June 2026 - September 2026

- Incoming

Meta, London, UK: Software Engineer Intern

June 2025 - September 2025

- Built a debugging tool for outage automation, Meta's system of tracking network outages
- Embedded, and captured API calls from existing services, stored them in MySQL and displayed them on UI
- Used Go for backend, PHP, React, and GraphQL for frontend, Thrift as IDL for sending API calls

Man Group, London, UK: Technology Summer Intern

June 2024 - September 2024

- Built ETL and ELT pipelines using various tools such as Flyte, Dagster, and Airbyte within Man's infrastructure
- Gave a company-wide presentation comparing pros & cons of different tools explored, giving insights to potential solutions for next generation Man pipelines

EDUCATION

Bachelor of Arts - Honours Computer Science Tripos

Graduating July 2026

University of Cambridge, Cambridge, UK

Selwyn College

Relevant Courses: Digital Signal Processing, Data Science, Databases, Operating Systems, Concurrent and Distributed Systems, Networking, Compiler, Cybersecurity, Machine Learning, Deep Learning, Cryptography

PROJECTS

Implementation of Gap Amplification

October 2025 - May 2026

- Studied and implemented Gap Amplification construction used in Dinur's proof of the PCP theorem in C++
- Studied various error-correcting codes used in PCP of Proximity constructions
- Explored advanced topics such as Fast Reed-Solomon Interactive Oracle Proof (FRI) protocol
- The project was supervised by Professor Tom Gur at Cambridge

Differential Analyser Simulator

January 2025 - March 2025

- Worked with a team of Cambridge undergrads to create a simulator for the [differential analyser](#)
- Focused on backend, and built objects simulating various components with TypeScript
- Project was praised as the most impressive professional achievement and runner-up for the most impressive technical achievement out of 20 projects by the Cambridge Department of Computer Science and Technology
- Featured on the [IEEE Annals of the History of Computing](#)

TECHNICAL SKILLS

Programming: C++, Python, Java, Go, Julia, SQL, OCaml, PHP, Prolog

Frontend: React, TypeScript, JavaScript, HTML, CSS

Tools and Frameworks: CMake, Thrift, Flyte, Dagster, Airbyte

OTHER WORK EXPERIENCE

Competitive Programming Society, Cambridge, UK: Contest Manager and Treasurer

June 2024 - Present

- Taken the role of contest manager in the 24-25 academic year, helped create contests for the society meeting
- Taken the role of treasurer in the 25-26 academic year, managed society finance

DMOJ, Online: Contest Author/Co-author

February 2022 – February 2024

- Co-authored three programming contests on DMOJ, set programming problems, made test data, and managed feedback from testers: [YAC 8](#), [SGSPC](#), [ARC](#)

Cambridge University Bridge Club, Cambridge, UK: President

September 2025 - June 2026

- Taught and introduced new members to the rules, bidding conventions, and strategies in contract bridge

HONORS & AWARDS

- Canadian Computing Olympiad (CCO) Bronze Medalist: Top 20 out of 3000+ Canadian participants
- UK & Ireland Programming Contest (UKIEPC), 18th in 2023, 14th in 2024, and 10th in 2025
